

Manual for Better Animation Events

Thanks for purchasing

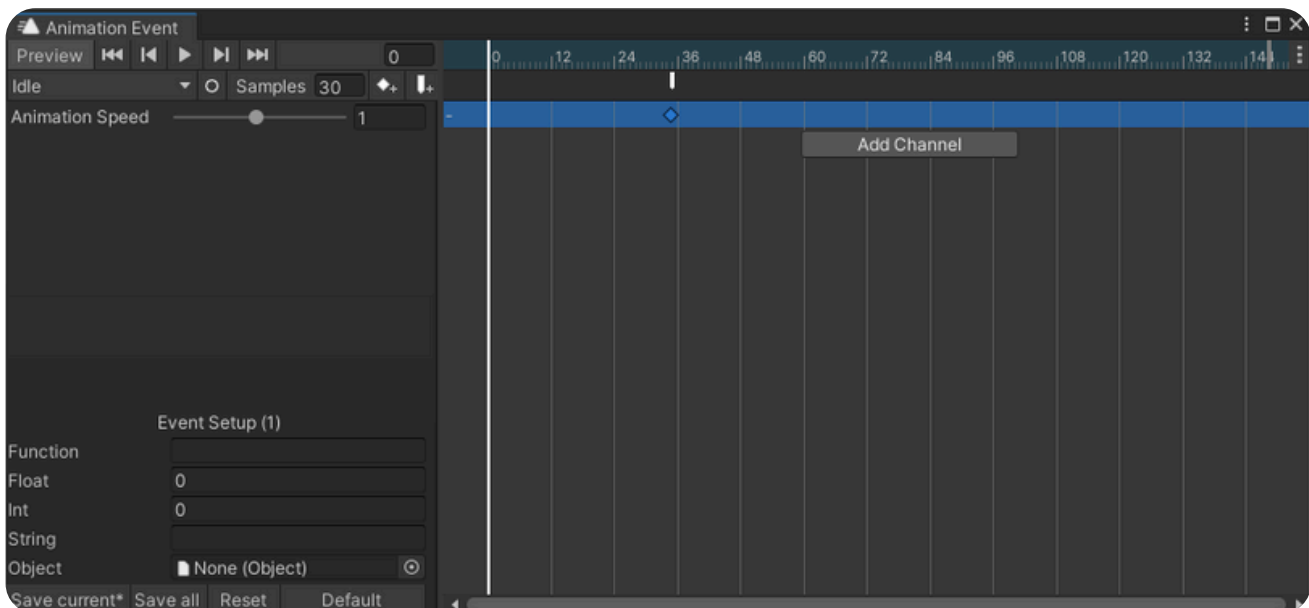

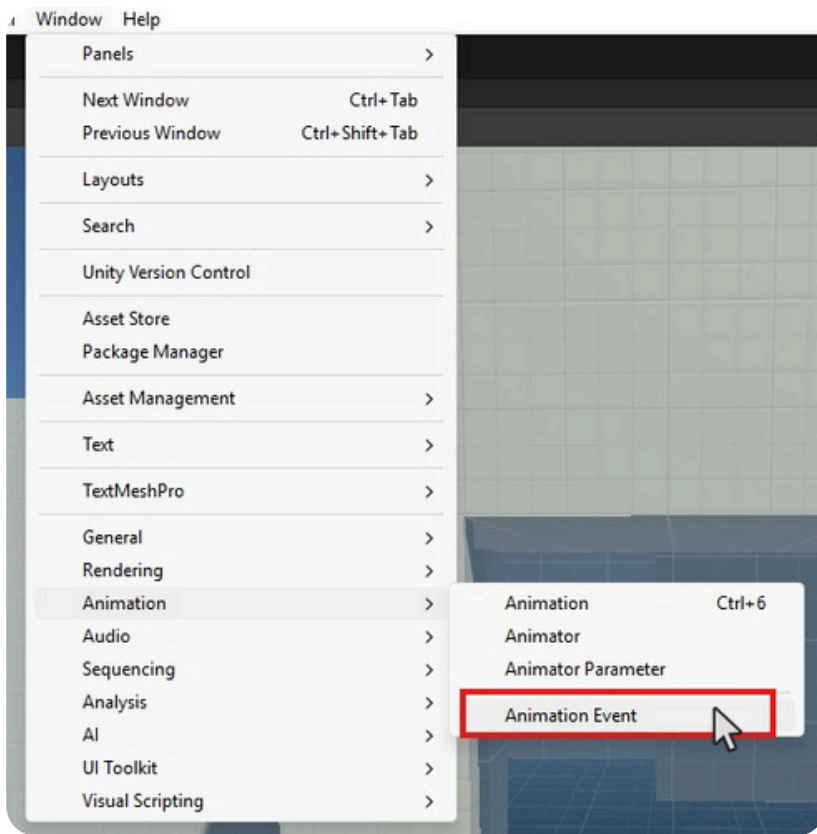

If you have any questions or feedback, please reach out!

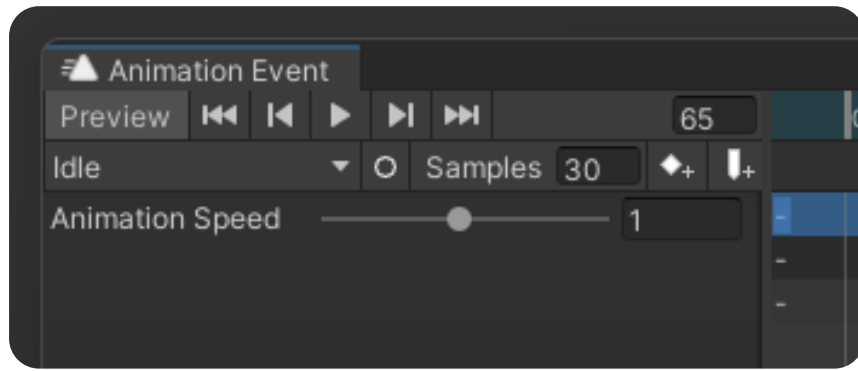

kugon02@gmail.com

Getting Started

Open Window / Animation / Animation Event

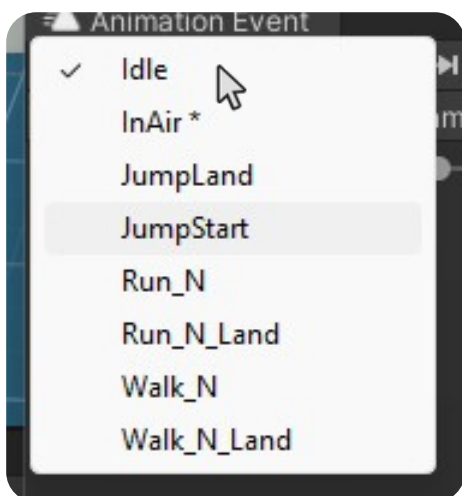

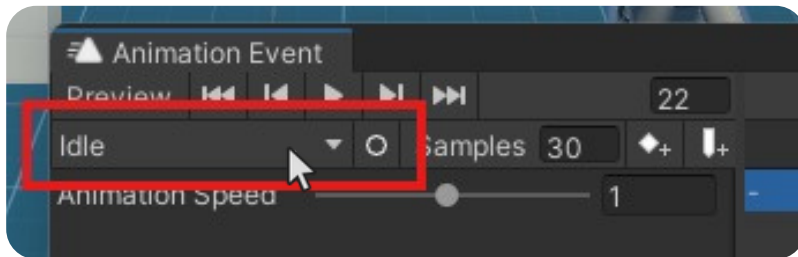

(If an **Animator** is already selected, the tool will detect it automatically on load)

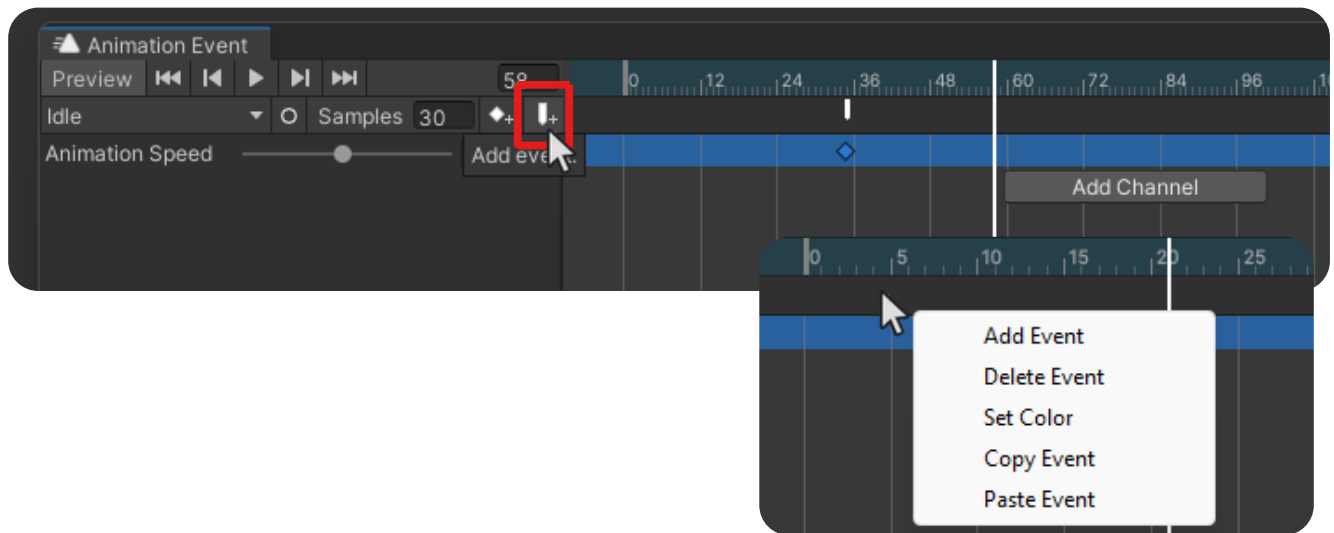

Control Menu works just like the Unity's Native Animation Editor with few extra features

Select a **GameObject** that has an **Animator** that has an **Animation Controller** in Hierarchy

Select an **Animation Clip** you want to edit

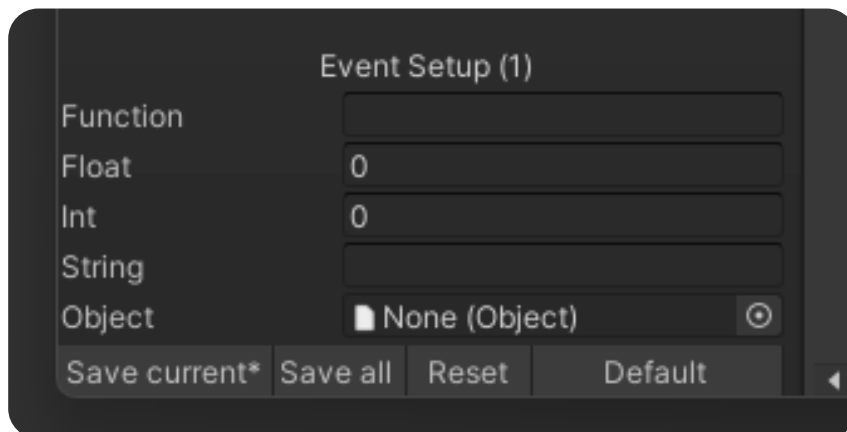

Adding an Event

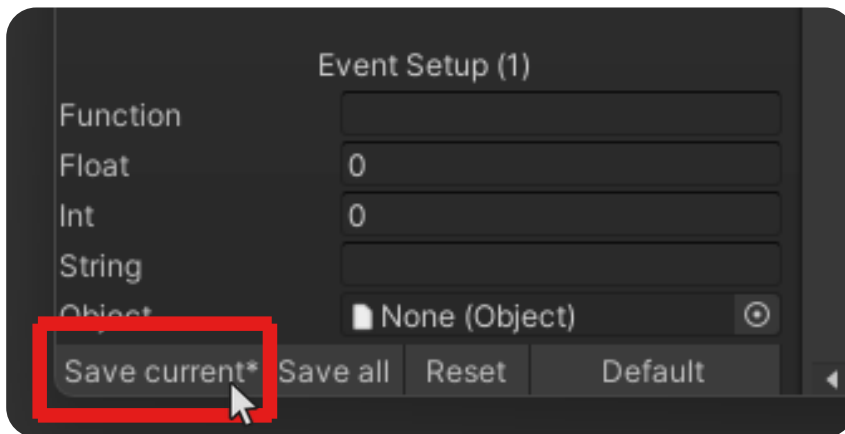

This will add an event on **selected frame** or **Right-click** to the bar will bring options menu.

Setting up an Event

Customize the event.

Saving Events

This will **overwrite** the original Animation Clip Events
("*" indicates whether the current clip has been saved)

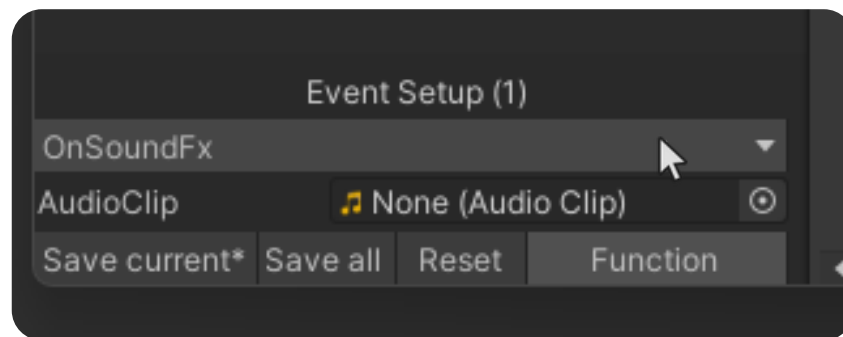

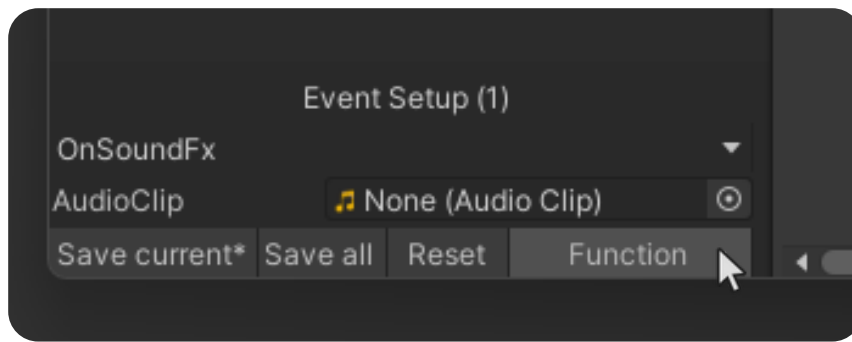

Saving All Events

It will save all the animation clips in the list.

Resetting Events

It will revert all event edits & channels in the current clip back to their original state.

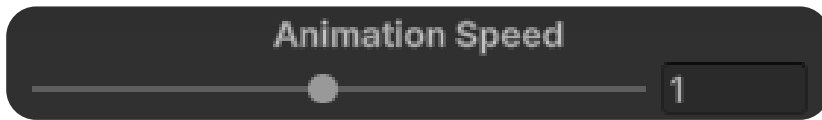

Click to **Default** to change **Event Setup** window

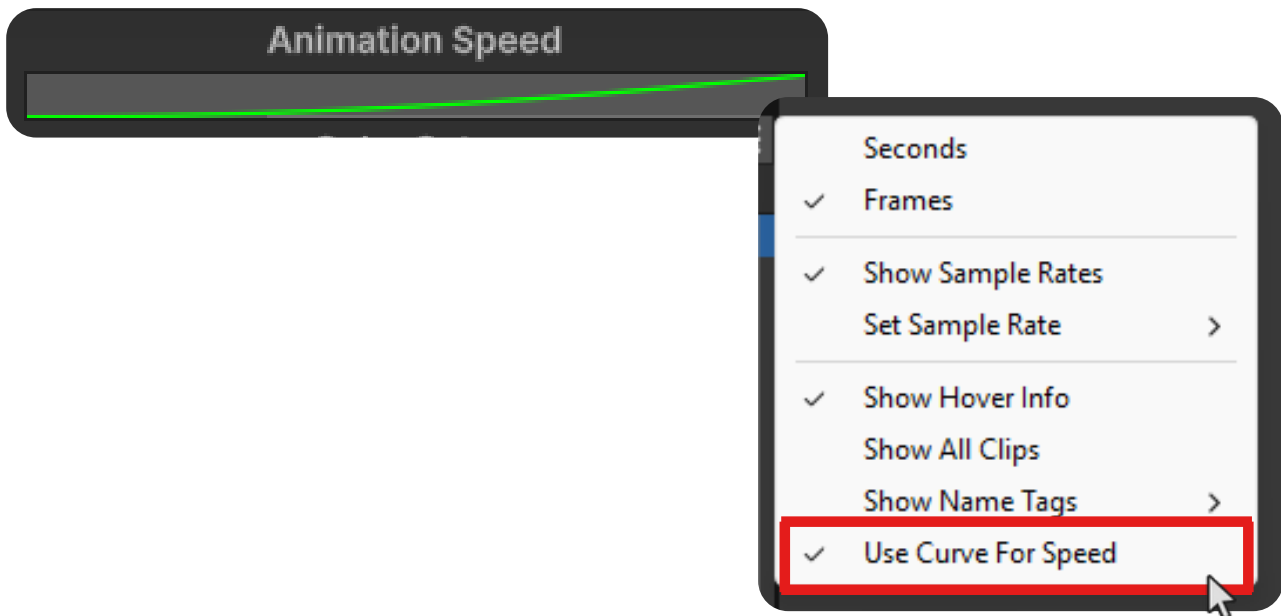

Here you can select a **function** available in the script attached to the Animator's Game Object

Animation Speed

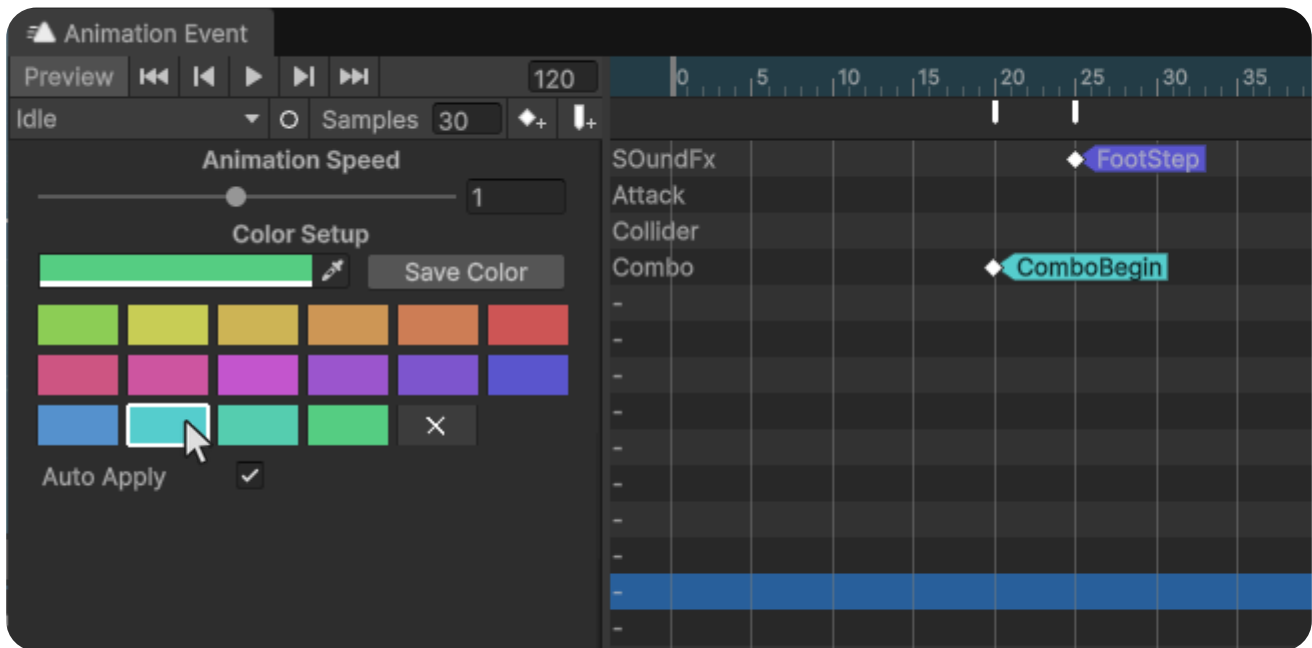

Control Animation Speed

You can also use **Animation Curve** to control the **speed** by **toggling** it on the **Menu Options**

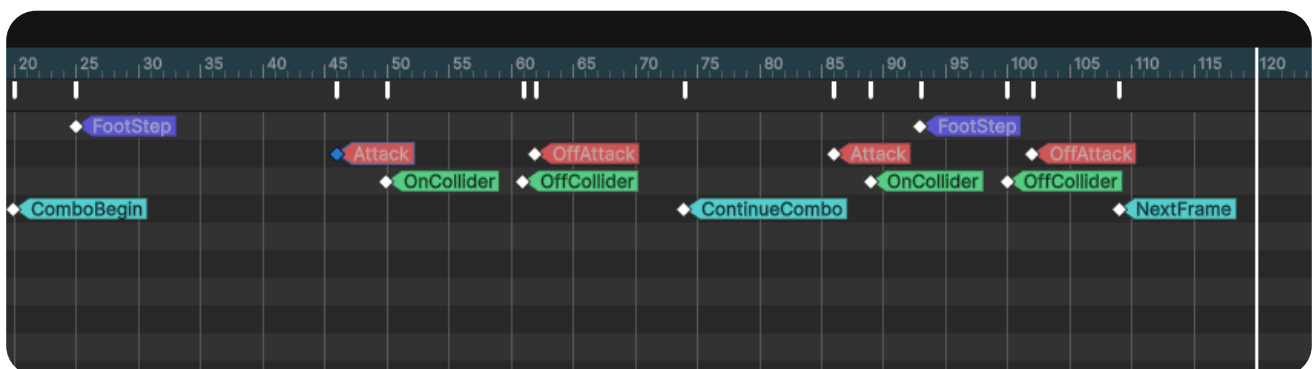

Color Setup

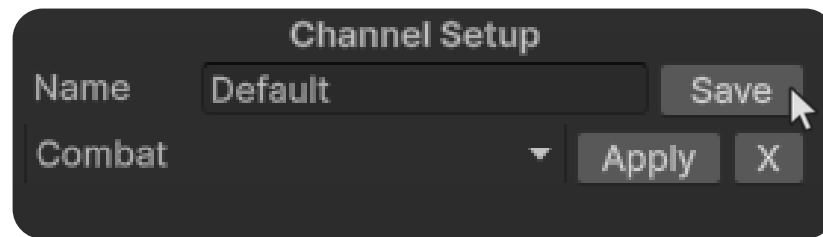

Create **custom colors** and apply them to **Animation Events** to make tracks easier to read and organize

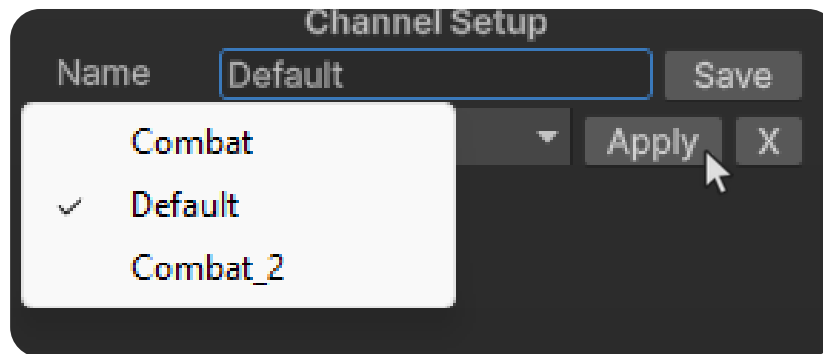

Select Animation Events and click to color. **Auto Apply** will apply selected color to new Animation Events

Channel Setup

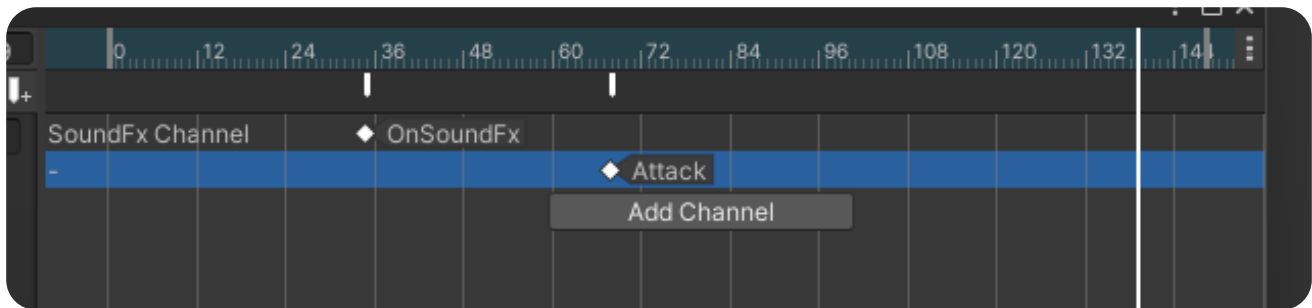

Create a template by **manually modifying** the channels and clicking **Save**.

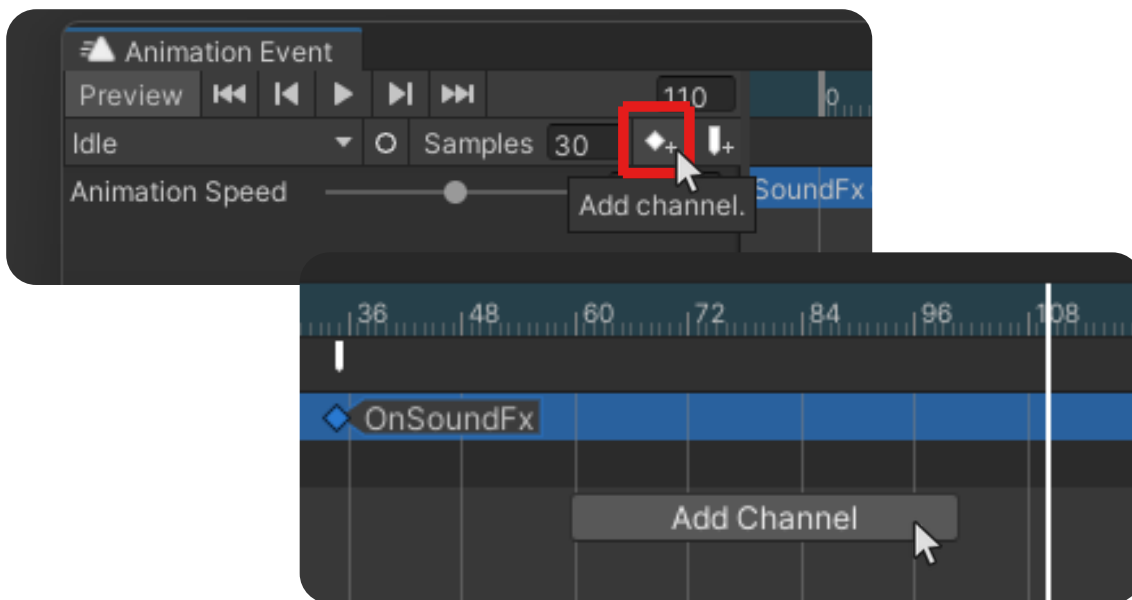

Here you can select a template to **apply** to the **currently selected clip**.

Timeline

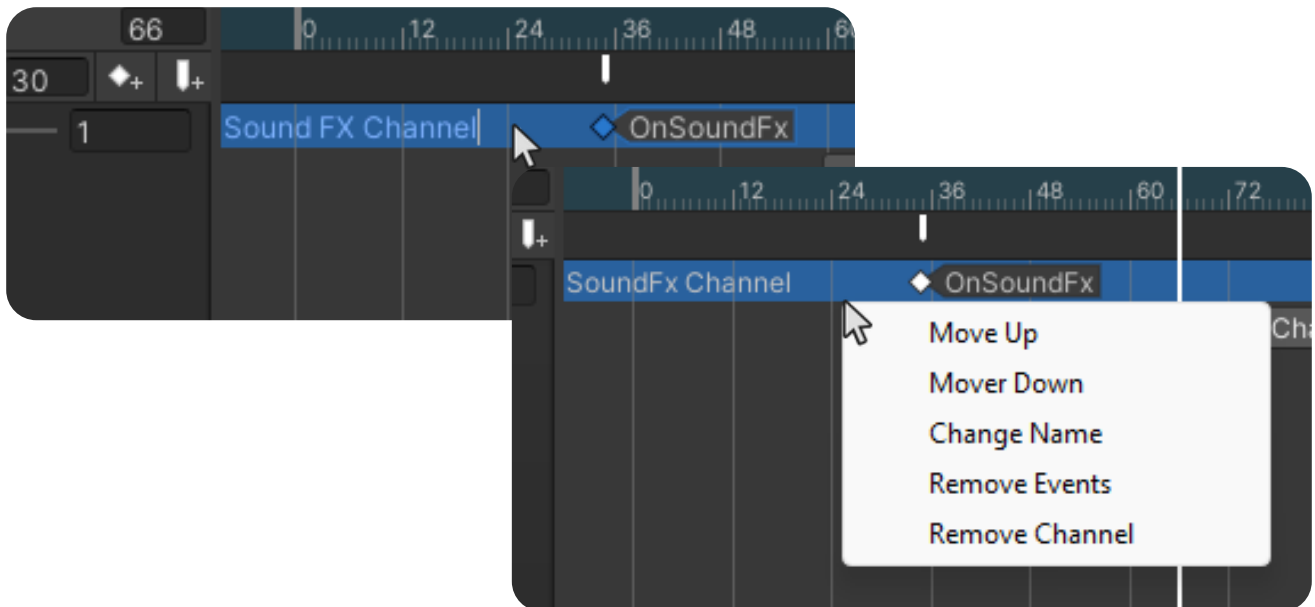

You can pan and zoom just like in the Unity's Native Animation Editor

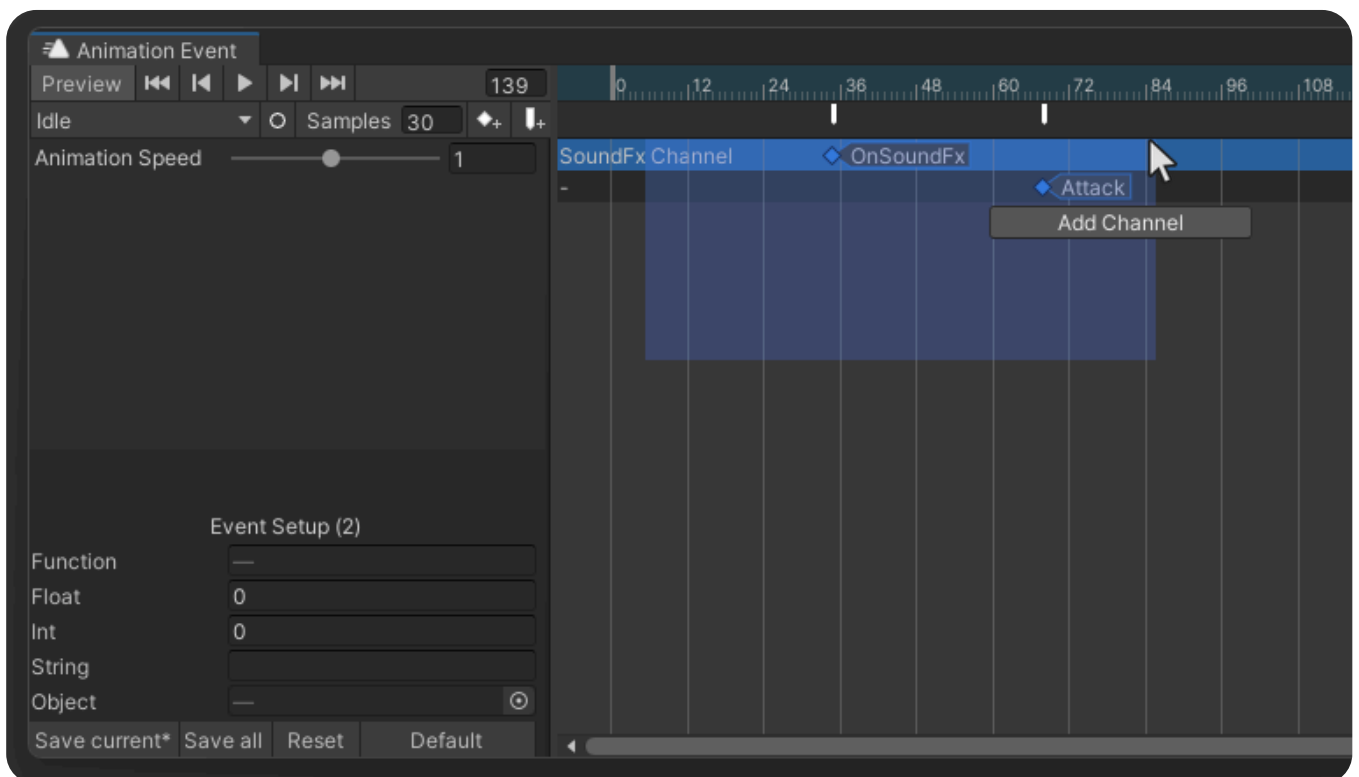

Adding a **Channel**

Double click to any channel to name it or right click to show **options menu**

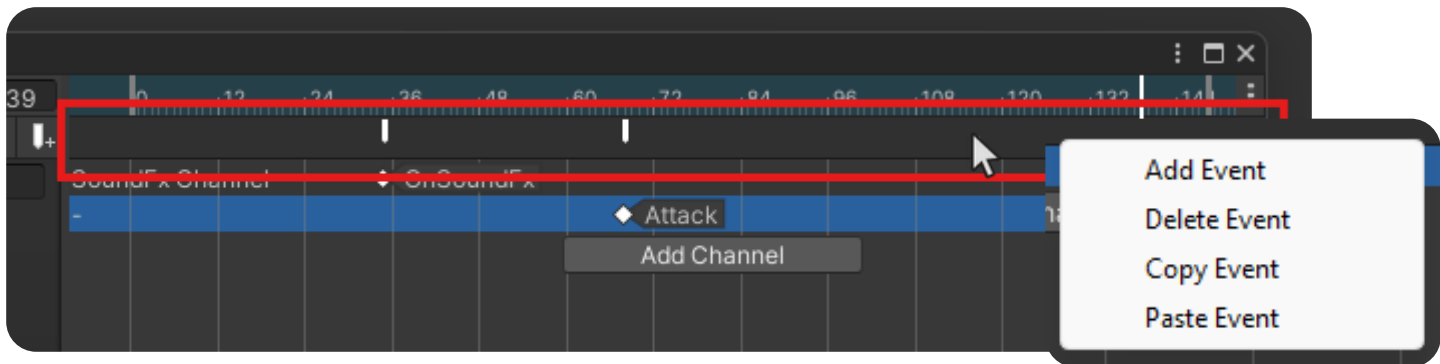

Event **Multi-Selection**

With Multi-Selection, you can easily **edit many events at the same time**.

Deselecting Events

Clicking to shown bar will **deselect** all the selected events
Right-click will **show event options**

Shortcuts

Use "**Left-Click**" to drag and drop selected events.

Use the **scroll wheel** to zoom in or out on the timeline.

Middle-click and drag to pan across the timeline.

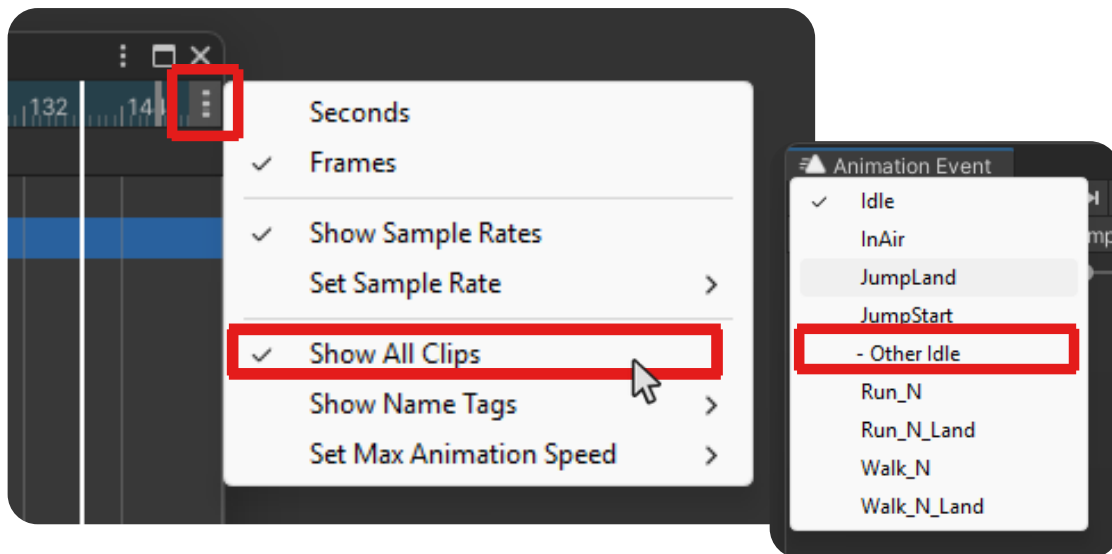

Press "**F**" to fit the entire animation clip to the timeline.

Press "**Delete**" to remove an event or multiple events.

Use "**Ctrl+C/V**" to copy and paste events.

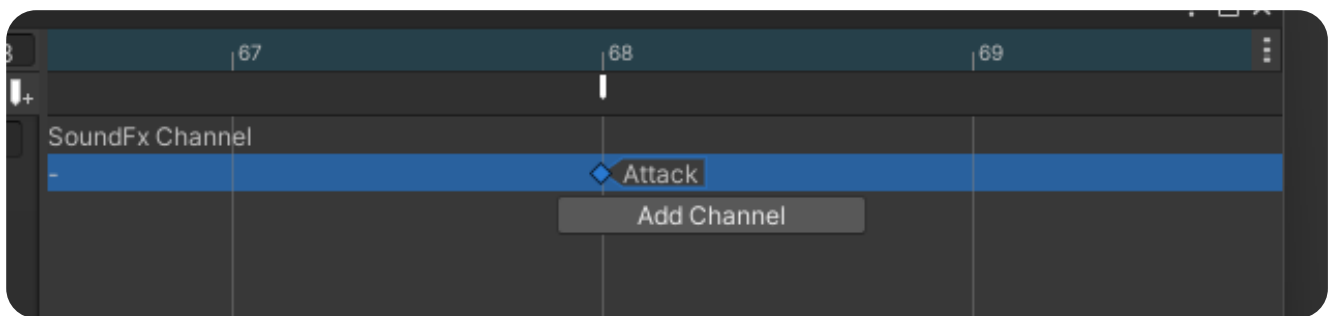

Use "**Left-Shift**" to select or deselect event.

Extras

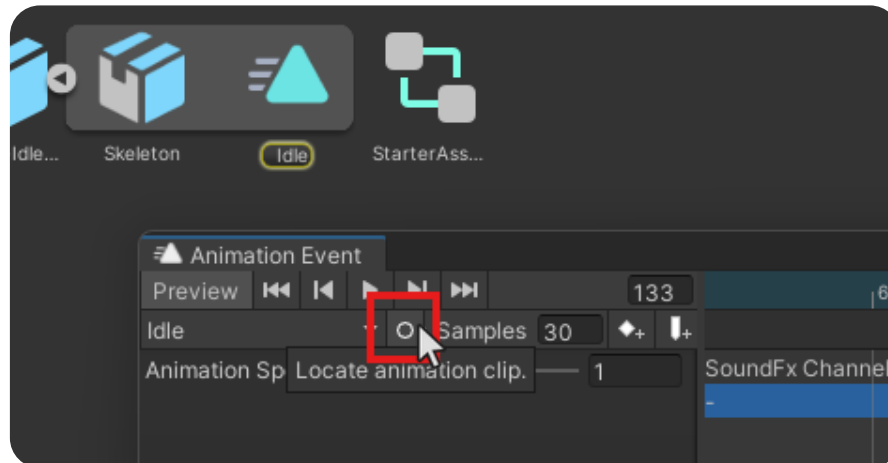

Show All Clips

This toggle will switch to display all the animation clips from all **previously selected animators** and will mark them with “ - ”

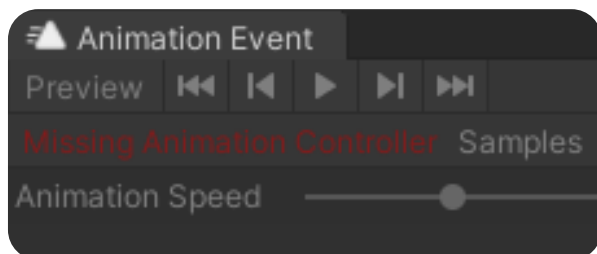

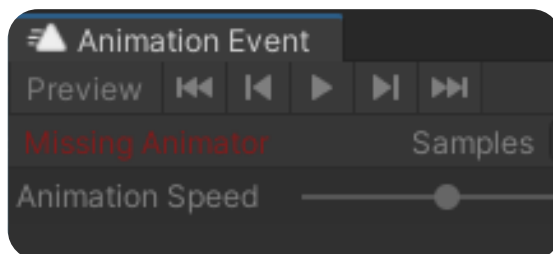

Quick Zoom

Pressing F will **zoom into** the selected events

Locate Animation Clip

It will **locate** the Animation Clip in folder

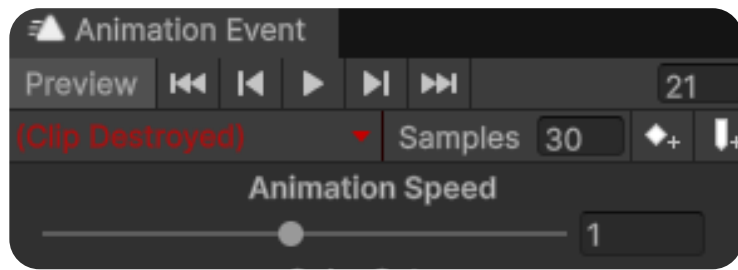

Warnings

Missing Animator

Select a Game Object with Animator in Hierarchy

Missing Animation Controller

Make sure Animator has a Animation Controller

Clip Destroyed or Lost

Select a clip to continue editing.
